Case Studies & Projects

RaskRask Recharge

UX/UI Designer | Frontend Developer

A complete overhaul of the corporate customer platform.

Frontend Development

- Developed a saas style dashboard with admin and employee permission differences
- Created a custom authentication system
- Back-end integration using RESTful AP
- Stack: Next.js, React, Typescript

UX/UI Design

- Conducted user research to gather insights, understand gains and pains
- Created user personas to help guide design decisions
- Built prototypes using Figma
- Designed the UI with a focus on usability and accessibility

Harmony UI - RaskRask

UX/UI Designer

Development of a Comprehensive Design System

- Developed a design system to ensure consistency, scalability and efficiency using Atomic Design
- Improved on the colour palette, typography, sizing and accessibility
- Created a component library of reusable UI components ensuring consistency and to streamline the design and development phase

Swish

UX/UI Designer | Full-Stack Developer

Pick-Up Basketball Web-App

- Used React with Typescript for building a dynamic and responsive UI and improve DX and code quality
- Integrated Ionic to use its UI components and focus on mobile-first, with the goal of creating a native app.
- Implemented RESTful APIs to handle authentication, game creation, and game discovery.
- Conducted user research to understand the needs of the user
- Created wireframes and prototypes using Figma
- Designed a visually appealing, consistent and intuitive interface, focusing on ease of use.

H&B - Digital Presence

UX/UI Designer - Frontend Developer

Online Platform Development for H&B

- Conducted user research and stakeholder interviews to gather requirements
- Developed wireframes, prototypes, and hi-fi designs using Figma
- Used BMC, and VPC for strategic planning and prioritisation
- Developed the platform using Wordpress and Elementor
